

STANDARD ELEMENTAIRE **ELEMENT STANDARD**

DETECTION D'HUILE SUR CIRCUIT DE REFRIGERATION

OIL DETECTION IN WATER COOLING CIRCUIT

B.79.22.A5.01 REV B

Page 1/3

PRINCIPALES UTILISATIONS

DOCUMENTS DE REFERENCE

Activer une alarme en cas de présence d'hydrocarbure, ou rupture de câbles, ou perte d'alimentation.

APPLICABILITE POTENTIELLE NAVIRE

Passagers Militaire Méthanier Rapide

MAIN USES

Elaboration of an alarm in case of oil detection, or cable break, or power supply failure.

POTENTIAL SHIP APPLICABILITY

LNG Tanker High speed craft Passengers Military

REFERENCE DOCUMENTS

MATIERE / TRAITEMENT DE SURFACE

MATERIAL / TREATMENT SURFACE

CARACTERISTIQUES

- Présence d'hydrocarbure : par mesure de conductivité
- Connexion: ½ "BSP (Entrée échantillon eau) 3/8 "BSP (Sortie eau)
- Alimentation unité de contrôle : 230 VAC ± 10% 50-60 Hz - puissance consommée 5 VA
- Unité de contrôles livrée en boîtier Protection ≥ IP44
- Température max : 110°C Pression max : 6 bar

CHARACTERISTICS

- Oil detection: conductivity measurement
- Connection: 1/2 " BSP (Water inlet) 3/8 "BSP (Water
- Power supply of control unit: 230 VAC ± 10% 50-60 Hz - power consumption : 5 VA
- Control unit Protection ≥ IP44
- Max. temperature: 110°C Max. pressure: 6 bar

Raccordement:

contrôle - commande du navire. Chaque chaîne de détection System. Each detection unit should give to IAS, a signal in devra donc adresser à ce SNCC un signal sous forme de normally close contact form, open in case of fault. contact normalement fermé, ouvert en cas de défaut.

Output:

L'alarme sera générée au niveau du système numérique de An alarm will be elaborated in ship's Integrated Automation

DOCUMENT DE CONTROLE A DELIVRER PAR LE FOURNISSEUR

CONTROL DOCUMENTS TO BE DELIVERED BY THE **SUPPLIER**

P.V. d'essai, certificat d'étalonnage font partie de la fourniture

Calibrating certificates as well as worshop tests certificates are part of supply

MATERIEL AVEC APPROBATION

MATERIAL WITH APPROVAL

- sans / without.

La fourniture sera conforme aux exigences de la société de classification du navire.

Material is to be built in accordance with the rules of ship's classification society.

FOURNISSEURS / TYPE SUPPLIER / TYPE FCX - GESTRA (AQUIRO)

INSTALLATION DU POT / POT INSTALLATION

Example of an ideal measuring pot arrangement

Example of a measuring pot arrangement at a lower point due to space limitations

① Preheater or cooler for oil or fuel. ② Water sampling point (½") on top of the main line. The line leading to ORGS 11-2 should be as vertically ascending as possible, * otherwise use five ½" S-type bends. ③ Measuring pot with oil detector/alarm. ④ Automatically operated quick-action air vent. ⑤ Drain valve. ⑥ Isolating valve for supply line. ⑦ Isolating valve for draining and purging. ③ Re-entry point of water sample, DN 10 mm. ④ Restrictor plate or throttle valve for generating a steady flowrate of 100 – 300 l/h or creating a differential pressure between valve ⑥ and ⑦ of approx. 0.1 bar.
